

[CAS No.: 119670-30-3] Z-LVG-CHN2

 <p>The chemical structure shows a complex molecule with a central amide linkage. On the left, there is a zwitterionic group consisting of a methylene group attached to a carbon atom that is double-bonded to a nitrogen atom with a positive charge and single-bonded to an oxygen atom with a negative charge. This is connected to a chiral center (marked 'Chiral') which is part of a chain containing two methyl groups and another amide group. The second amide group is further connected to a benzyl group (a methylene group attached to a benzene ring).</p>	CAS No. :	119670-30-3
