

[CAS No.: 26462-22-6] Isoleucylleucine

 <p>The image shows the chemical structure of Isoleucylleucine. It consists of an isoleucine residue (left) and a leucine residue (right) connected by an amide bond. The isoleucine part has a methyl group (H₃C) on the left, a chiral center with a methyl group (CH₃) on a wedge and an amino group (NH₂) on a dash, and a carbonyl group (C=O) on the right. The leucine part has a chiral center with a hydroxyl group (OH) on a wedge and a methyl group (CH₃) on a dash, and another methyl group (CH₃) on the right. The amide bond is between the carbonyl of the isoleucine and the nitrogen of the leucine.</p>	CAS No. :	26462-22-6
