 <p>The chemical structure shows a central benzene ring. On the left, there is a proline ring (a five-membered ring with one nitrogen atom) attached to the benzene ring via its nitrogen atom. The proline ring has a methyl group (H₃C) and an amino group (NH₂) attached to the alpha carbon. On the right, there is a pyridone ring (a six-membered ring with one oxygen atom and one carbonyl group) attached to the benzene ring at the 2-position. The pyridone ring has a trifluoromethyl group (CF₃) attached at the 4-position. The label 'Chiral' is placed near the pyridone ring.</p>	CAS No. :	125791-92-6
