

## [ CAS No.: 89371-37-9 ] Imidapril

 <p>The image shows the chemical structure of Imidapril. It features a 2-methylimidazole ring system. One nitrogen atom is substituted with a methyl group (CH<sub>3</sub>). The 2-position of the imidazole ring is substituted with a propionamide group. The alpha-carbon of the propionamide is substituted with a methyl group (CH<sub>3</sub>) and a chiral center. This chiral center is further substituted with a propyl chain that is linked to a benzene ring. The propyl chain is also substituted with an ethyl ester group (-OCH<sub>2</sub>CH<sub>3</sub>). The word 'Chiral' is written above the chiral center.</p>	CAS No. :	89371-37-9
