

[CAS No.: 110267-81-7] Amrubicin

 <p>The image shows the chemical structure of Amrubicin. It features a central piperidine ring with a methyl group (H₃C) and an amino group (NH₂) attached. This piperidine ring is linked to a complex polycyclic system consisting of a benzene ring fused to a five-membered ring with two carbonyl groups (C=O). A chiral auxiliary, represented by a benzene ring labeled 'Chiral', is also attached to this system. A side chain containing a tetrahydrofuran ring with two hydroxyl groups (HO) is connected to the piperidine ring via an ether linkage.</p>	CAS No. :	110267-81-7
