

[CAS No.: 154-21-2] lincomycin

 <p>The image shows the chemical structure of lincomycin. It consists of a 2,6-dimethylpiperidine ring with a methyl group on the nitrogen and a propyl group at the 2-position. This ring is linked via a carbonyl group to a chiral carbon atom. This chiral carbon is also bonded to a methyl group and a hydroxyl group. This carbon is further linked to a ribose sugar ring, which has hydroxyl groups at the 2, 3, and 4 positions and a methylsulfanyl group at the 5 position. The word 'Chiral' is written above the structure.</p>	CAS No. :	154-21-2
